

The professionals are here.™

Indoor Air Quality • Environmental Due Diligence • Pollutant Management • Consulting • Training

Experience is the difference between good enough and guaranteed.

ENPRO Environmental is a nationally operating consulting firm that delivers a complete range of environmental investigation, consultation, management and training support. In addition to Environmental Due Diligence Services, including Phase I and Phase II assessments, we perform specialized Indoor Air Quality Services (including mold investigations) that focus on preventive and responsive programs for maintaining healthy indoor environments. Our team of certified environmental professionals has over 50 years of experience, and follow a precise standard of excellence to ensure the most responsive, in-depth service in the industry. At ENPRO Environmental, we take our performance so seriously, we guarantee our services meet or exceed current industry standards. And when it comes to handling your environmental concerns, no business should settle for anything less.

All your environmental consulting needs. One trusted resource.

Indoor Air Quality

With advances in construction and building technology come new concerns regarding moisture intrusion, indoor air quality (IAQ) and the increased potential for health and liability issues. As a result, indoor environments have become an area of specialization in the industry—especially as it relates to mold and moisture. Our team includes certified technicians and trained IAQ professionals who have helped pioneer the development of industry standards for IAQ investigations. Our experience allows us to provide our clients with responsive, accurate investigations. We also specialize in prevention and response plans that serve as safeguards against potential liability, property loss or health concerns.

IAQ Services

- *Mold & Moisture Prevention Planning*
- *Origin & Causation Investigations*
- *Comprehensive IAQ Investigations*
- *Remediation Management*
- *Building Science Forensics*
- *Expert Witness/Consulting*
- *Post Remediation Verification (PRV)*
- *Comprehensive Asbestos/Lead Surveys*
- *Third-Party Evaluations*

Environmental Due Diligence

The specialized process of an environmental site assessment (ESA) requires a team of certified professionals that have the knowledge and experience of performing ESAs on a diverse range of site conditions and locations. Having worked on thousands of job sites across the US and throughout the Pacific, our team has the experience to help ensure expediency, accuracy and efficiency on every job site, for every client.

Environmental Services

- *Limited Survey for Moisture & Visible Microbial Growth (LSM)*
- *Regulatory Support*
- *Phase I Environmental Assessments*
- *Phase II Assessment & Program Development*
- *Soil/Groundwater Investigations*
- *Underground Storage Tank Management*
- *Phase III Site Remediation*

Pollutant Management

ENPRO Environmental's team of professionals have worked with hundreds of customers to address and remedy potential environmental conditions at sites throughout the US. From compliance to disposal, our ability to respond quickly is a key factor in our client satisfaction.

Pollutant Management Services

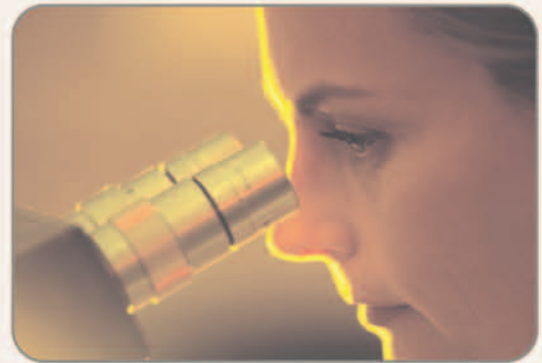

- *Operation & Maintenance Plans*
- *Risk-Based Assessments*
- *Permitting/EIS/EIA*

Our Standard of Excellence

We respond to our clients' needs—quickly and efficiently.

ENPRO Environmental specializes in something many other environmental companies don't—fast, efficient service. Our number one goal is to provide responsive, accurate and targeted results that meet our clients' specific needs. We listen to our clients, and make it our business to respond as an active member of the team responsible for success.

Experience equals quality and reliability.

Every investigation, assessment, and report is managed, executed, and reviewed by our staff of experienced science and technology professionals. Whether working under extreme conditions or on routine assignments, our certified environmental professionals are trained to specific standards of excellence that exceed current industry standards.

We lead by example—and set the standard for the industry.

Our team has earned a national reputation for quality service. Clients rely on our exceptional depth and breadth of expertise—in the services we provide, in the industries we serve, and in the regions where we work—to add value to their projects. Our experience in the industry has also earned us the credibility and leadership to assist in developing national industry protocols and standards, as participating members of scientific and industry organizations.
