

FOR IMMEDIATE RELEASE

MOLDPRO INTERNATIONAL CHANGES COMPANY NAME TO ENPRO ENVIRONMENTAL

Name Change Reflects Company's Ability To Provide A Full Range of Environmental Consulting Services Beyond Mold

KAILUA, HI. – August 16, 2004 – MoldPro International, a leading U.S. environmental consulting firm based in Kailua, Hawaii, announced today that it has officially changed its company name to ENPRO Environmental (<http://www.enproenvironmental.com/>). This change was sparked by the company's desire to leverage their full range of environmental consulting services that extend beyond their well-respected indoor air quality (IAQ) and mold expertise.

ENPRO Environmental previously had been providing environmental services using two separate company names. MoldPro International focused on IAQ investigation, consultation and training. A division of MoldPro, known as Environmental Professionals, handled traditional environmental services such as Phase I and Phase II environmental site assessments, asbestos, lead paint, storm water, permitting and soil and groundwater remediation.

“We have a very knowledgeable staff of professionals with extensive experience beyond mold and indoor air quality,” said Randy Herold, President of ENPRO Environmental. “Our company identity needs to reflect that. Indoor air quality is still an important specialty, and many of our customers have come to rely on our thorough, professional, quality service. But we also offer this same quality in all aspects of environmental assessment, and people who hear the name MoldPro think we're only about mold.”

The name ENPRO Environmental, Herold believes, communicates the company's broad platform of services. The name change also reflects the company's growth over the past year. “A large percentage of our business addresses mold and moisture issues,” continued Herold, “but recently, businesses have turned to us for all their environmental needs. We feel it's because we offer responsive service that perhaps customers aren't finding at larger firms,” explained Herold.

With corporate headquarters based in Kailua, Hawaii, ENPRO Environmental conducts environmental and IAQ assessments nationwide. Additionally, with a large group of experts on hand, ENPRO Environmental is an often-tapped training resource for businesses seeking to educate their staff on certain environmental issues, such as mold loss prevention and response.

ENPRO Environmental is launching their name change with a complete corporate identity campaign including a new logo, Web site (<http://www.enproenvironmental.com/>) and supporting marketing materials to promote their new brand. The changes are effective immediately, and the company's business activities will be conducted as ENPRO Environmental.

About ENPRO Environmental

ENPRO Environmental is a nationally-operating consulting firm that offers a complete range of environmental investigation, consultation and training services. In addition to complete Phase I and Phase II assessments, ENPRO Environmental offers specialized indoor air quality services that focus on preventive and responsive programs for maintaining healthy indoor environments. ENPRO's complete line of services include evaluating and assessing residential, public and commercial environments, prevention planning and design, strategies and protocol for corrective action, remediation management and post remediation evaluation.
